What is Kanbanize?

Kanbanize is enterprise-ready Kanban software for agile project, product, and portfolio management. It provides visibility across all teams, connects strategy with execution, and helps teams deliver faster.

Built upon the idea that all processes evolve, Kanbanize can easily adapt to changes in your organization, regardless of it being a start-up or a fortune 100 enterprise.

Equipped with the most advanced feature set in the industry and a support team that is second to none, Kanbanize is a trusted vendor for more than 1000 companies and 200+ partners all over the world.

Who are we?

Our vision

We are on this planet to help people do meaningful work and by that accelerate innovation.

Our mission

Our mission is to discover new management ways and share this knowledge through amazingly powerful tools that are easy to use.

Set of beliefs

The products we create follow a simple, yet profound, set of beliefs. We believe that you need balance on the individual level to get sustainable excellence. You need team Excellence to create superior Value through your projects and products. Creating value at a predictable pace is a prerequisite to creating a cohesive portfolio of products, which is a requirement for gaining a competitive edge as a company. The more competitive edge you get, the more room for innovation there is to help the world be a better place.

Why Kanbanize?

At Kanbanize, we chose to create tools on top of the Kanban method for it is a humane approach. It shields us from the chaotic environment and gives us the focus to deliver the right product at the right time, and makes us more productive. We know that all work matters, but we also acknowledge that we can't do all work simultaneously. Here is why we give you the tools to navigate your environment in an easy and non-stressful way. Mastering this balance is a prerequisite to achieving true agility on the collective level.
